

**PRESS RELEASE**

**Aeolus Energy Group Awards Tower Fabrication  
Contract to Ventower Industries**

*Complete Training Towers Will be Installed  
at New Offshore Wind Training Facility*

**April 3, 2018 - Orlando, Florida:** Aeolus Energy Group (AEG), a market leader in wind turbine maintenance and repair has awarded a contract to Ventower Industries for the fabrication of the training towers to be installed at its new offshore wind training facilities. "Our goal is to prepare an American workforce for the opportunities in offshore wind. AEG itself expects to add thousands of jobs of all kinds to our business in the coming years." said Elia Golfin, CEO of AEG.

"AEG has a safety-first approach." said Gregory Adanin, CEO of Ventower Industries. "Our towers will play a key role in the training, preparation and certification of this first generation of US offshore wind workers, we are proud to be part of that."

With its initial training facility to be located in Massachusetts, AEG will assist in preparing a new workforce for constructing and maintaining offshore wind farms. The facilities will have all of the necessary equipment, such as access towers, pools and classrooms to train to the Global Wind Organization (GWO) standard. GWO is a safety standard developed by the offshore wind industry in Europe, largely considered the gold standard for industry safety.

"We look forward to working with the local community, veterans service organizations, unions, local colleges and universities even technical high schools to give students and workers a path to a career in offshore wind," adds Golfin.

It is expected that the initial AEG training facility will be constructed, staffed and ready to begin training workers by the spring of 2019.

**Elia Golfin BIO:** *With vast experience in the Onshore/Offshore wind and Solar energy industries, including a variety of executive posts, Golfin brings considerable insight to his position as Founder and President of Aeolus Energy group. A technology and aircraft enthusiast, Golfin is a long-time airline pilot, who flew routes in the United States, Australia, and Europe. He completed a Bachelor of Aviation at the University of Western Sydney, mastering such courses as aircraft mechanics, aviation safety, aerospace dynamics, and aviation management. He also earned an Advanced Diploma of Aviation at Navair International Flying College. A native of Australia, Golfin currently lives in the United States.*
